HPL Vanity Unit

High Pressure Laminate (HPL)

Our HPL Vanity Units are a cheaper alternative to Solid Grade Laminate but give the same great looks. With a choice of over 80 colours this range allows designers to create the perfect washroom to compliment the cubicles and surroundings.

Manufactured from 19mm High Pressure Laminated Moisture Resistant Chipboard this range is durable enough to cope with most medium – high usage areas, whether the project is for retail, leisure, office applications or educational needs.

Solid Grade Laminate (SGL)

Our SGL Vanity Units are the hardest wearing and durable Units we sell. Postformed with integral upstands and downstands, removable access panels under each bowl all of which are made to measure to offer enough flexibility to suit any customer needs.

SGL offers a clean and hygienic finish and combines great looks with durability, designed to with-stand the most vigorous work loads. Manufactured from 12.5mm SGL used for the tops and under panels with a multiple choice of colours to compliment or contrast your cubicle system.

VANITY UNITS
